SKILLS

Project Management and Leadership:
PMP (project management professional)
Agile Development using SCRUM
Architecture Techniques:
SOLID principles, Dependency injection, Software architect, Domain-Driven Design, Design patterns, SDLC, TFS, Git.
Programming Skills:
.Net Core 6, MAUI, Blazor, ASP.NET MVC, Web API, C#, AJAX, LINQ, jQuery, SignalR, Angular, ReactJs, Typescript, JavaScript, Xamarin, Flutter, HTML, CSS, bootstrap, RabbitMQ
ERP:
Microsoft Dynamics AX Development using MorphX X++, AIF, Microsoft Nav.
Database Management Systems DBMS:
SQL Server, Oracle, MySQL, Sybase, Firebase, MongoDB
Portals & Cloud:
Dockers, Microsoft Azure, Microsoft Sharepoint server development & administration

EDUCATION

BSc in Computer Science & Management Technology (2003/2004),

OVERVIEW

With a comprehensive background spanning 16+ years in the software development industry, I have consistently excelled in creating and overseeing software solutions tailored for diverse projects of varying scales. My expertise lies in optimizing software implementation to augment performance and response time through the application of cutting-edge methodologies in software development, including application architecture, data structuring, and advanced algorithms.

I successfully executed numerous integrations utilizing a wide range of techniques, such as leveraging APIs, databases, queuing services, background services, and other innovative approaches, that enabling efficient data flow and enhancing overall system functionality.

I delivered of 15+ highly successful projects across multiple industry domains, encompassing e-commerce, education, insurance, manufacturing, and motors. Through meticulous project management and a profound understanding of the unique requirements within each business domain.

EXPERIENCE

.NET stack Consultation & Support at **Iron Software.** March 2020 till now
A software house specialises in developing Nuget Packages
(www.ironsoftware.com**)**
Responsibilities:

- Worked with the development team to upgrade the IronPdf package's current version.
  Actions: Refactored library core to be scalable and injectable to resolve usability issues.
  Results: our engine got inclusive features over all competitors
- Worked with the management team in planning to support our products.
  Actions: Built multiple technical and tutorial guides, supported clients who posted their questions on the Stack Overflow website and created various channels of support on the website (chat and tickets)
  sample
  (https://ironsoftware.com/csharp/webscraper/tutorials/webscraping-in-c-sharp/)
  Results: we gain a high reputation and high rate between our customers and inside the IT community
- Educate and train support and development team.
  Actions: Trained the support team on how to investigate customer tickets and differentiate between bugs, misconfiguration, or feature requests. Created a cross teams support escalation plan based on severity.
  Results: Remove work duplications. A more precise team road map.

EXPERIENCE

Solution Architect at **Qara.net** that works as a FinTech company that provides business trading solutions (Part-time Job)	March 2020 till now
Responsibilities: Architecting system able to handle the substantial daily transactions and scales up with time. **Actions:** Train and mentor technical team members' development skills. **Results:** Enhance code quality and reduce bug numbers and severity **Actions:** Applied Microservice Architecture and upgraded the existing system into separate services. **Result:** Improved productivity, Better resiliency, Increased scalability, Optimize business functionality **Actions:** Applied modern technologies and tools. (Docker, Hangfire, RabbitMQ) **Results:** Enhance productivity and encourage them to don't reinvent the wheel. (reused pre-exists libraries)	
Technical Lead at **Integrant Inc.** works as a software house with head office in the USA (www.integrant.com)	May 2018 till March 2020
Responsibilities: Worked with the forte web team as technical lead, **Challenges**: No Agile. No roadmap. The team is always overloaded with work (14 – 18 Hours daily) and never meets deadlines. **Actions:** Advised the customer to apply code best practices to avoid future impacts. **Results:** Improved customer trust. This reflects on us by handing us the whole project rather than being part of his development team and opening another project with our company. **Actions:** Rearranged the team, encouraged them to use Agile Development Management methodology, and applied clean code and best practices. **Result:** Better process quality, productivity and performance while working under pressure to meet the customer requests for many modules within the time frame.	
Project technical Lead for **Egypt Assets** (government project)	6-month contract in 2020
Responsibilities: Worked as project technical lead **Actions:** Plan, architect, estimate, prioritises, and lead the development team to build a high and scalable core application that manages all country assets. **Results:** Delivered on time with validating migrated data from all states to centralised applications and passed all quality, performance, and security checks. Coordinate, follow up and assign tasks to project team members.	
Technical lead & Solution Architect at **MotoSoft** works as a software house specialising in Motors services software solutions **(**www.MotoSoft.com**)**	May 2017 till May 2018
Responsibilities: Worked as technical lead & Solution Architect with MotoParts Team **Actions:** coordinate and manage tasks between around 14 team members from different locations and different work types (full-time, part-time and freelance) **Results:** delivered portal on time with required customer quality and operational without issues.	
Development Team Lead at **Smart Prestige Emirates** – Egypt Branch **(**www.prestige.ae**)**	September 2015 Till May 2017
Application Development Manager at **Saudi Silicon Company** (www.Siliconsaudia.com)	Nov. 2013 till Sep. 2015
Development Manager at **Interactive solutions IT – KSA**	Jan. 2012 till Nov. 2013
Senior Web Application Developer at **TravcoGroup – Egypt (**www.travcogroup.com**)**	January 2008 till January 2012
Technical Instructor at **Global Knowledge – Egypt (**www.globalknowledge.com**)**	August 2006 till January 2008
Solution Developer at **Typical Design – Cairo (**www.td.com.eg**)**	November 2004 till April 2005

PROJECTS

PBCO	**Online POS:** Online POS connected to 18 restaurant backend (Microsoft dynamics Nav and Business central) and integrated with external ordering providers that accept orders from (Tiger CRM, Hunger station, Wassal, Marsool , etc.)

Integrant Inc.	**Forte Web:** is a web solution for US Wood Engineering production companies. The online portal provides features of design floor, wall, and roof analysis product depths, widths, and several plies for spans and loads. **Technologies:** ASP.NET MVC, WebAPI 2, Angularjs, Html 5, bootstrap, Css3, MSSQL, Azure cloud (Blobs), Agile Scrum, client-side testing (Karma, Mocha, Jasmin). **BEST Life (Health insurance management system):** Best Life provides dental, vision, and life insurance in the US. The system consists of two main applications. HIAS is an ASP.Net application to manage insurance plans, coverage for customers and individuals, billing, and invoices. The second application is the WCF windows service implemented to integrate with Federal and other states using X12 structures (834,820) templates for exchanging and pre-processing. **BEST Detector:** I implemented a new application to help the operation team investigate issues and automate some operation team tasks. **Technologies:** ASP.NET Web Forms, MVC, WebAPI, WCF, Telerik Controls, MSSQL and SSRS, JQuery, TFS/Kanban for operation, Agile Scrum for development tasks
Iron Software	**IronSoftware** is a software company that provides libraries and packages that help .net developers. **IronPdf**: library to convert HTML to Pdf and has capabilities to edit on existing pdf **IronOCR**: library to extract text from image or pdf. **IronBarCode**: library to scan the barcode from an image or pdf **IronWebScraper**: library to scrap online websites and extract their content. **IronXL.Excel**: library to open/create/manipulate excel files. **Technologies**: Dockers, ASP.Net Webforms, MVC, C#, VB.NET, Html 5, Css3, bootstrap
MotoSoft	**Moto Scan**: is a solution that manages car service centers containing modules like • Reservation module: to enable car owners to reserve an appointment. • Queue module: When the car arrives at the service center, it is queued into the queue system. • Inspection module: read car test results from test instruments (by accessing local machine storage or by contacting machine API to get required information using machine SDK) and save them into the car profile. **Moto Mart:** portal to sell and buy cars **Moto Rent**: portal to rent cars **Moto Parts**: portal to sell and buy car spare parts **UMS Wrapper**: integration wrapper to integrate all systems with online car information distributors **Technologies:** ASP.Net MVC, C#, WebAPI 2, Html 5, Css3, Bootstrap, Angular 5, typescript
Smart prestige	www.kwtauction.com : Real-time Car Auction www.reemflowers.net : Online Flower Store www.bcsconf.com : Online Conference website www.uaeflag.ae: Complete Content management system (CMS) for handling website dynamic content issues like Text, Photo gallery, creating/updating new pages activating/deactivating pages, managing online competitions, etc. **Intranet Spinneys Employee Portal:** news, new vacancies, events
Saudi Silicon	**HR system:** employee directory and contracts modules
Interactive solutions IT – KSA	**Employee material request (EMR):** integrate the Alothaim Internal Portal HR system with Alothaim Dynamics AX ERP to let Internal Portal Employee users request materials from the inventory Module in Dynamics AX, and after the Approval cycle in dynamics ax, the requested item is sent to employee and inventory affected by this action. **Vendors Bank Payment Service (B2B):** integrate Alothaim Microsoft Dynamics AX ERP With Alahli NCB Bank B2B Gateway to Provide Alothaim Finance Department with a new feature to send vendor payments electronically using NCB online gateway directly from Microsoft Dynamics AX ERP. **Technologies**:

	Microsoft Dynamics AX 2009, AIF, MorphX X++, Microsoft visual studio 2010, ASP.NET 3.5 C#, ASP.net Webforms, C#, SharePoint 2013, TFS, web services,
Travco Group	**www. jaz.travel**: Online Real-Time Hotel Booking engine. **Tasks and versions:** 1- **@2008** Analyze and design implement a complete content management system (CMS) for handling website dynamic content issues like Text, Photo gallery, creating/updating the new hotel, activate/deactivating the hotel, etc. 2- **@2009** analyses, design, and implement a real-time online booking engine that connects over 60 hotels with the website in a real-time 2-way booking system that gets available and saves reservation direct to the hotel management system. 3- Design, develop and implement internal reservation monitoring and reporting system. 4- **@2010** Upgrade the online booking engine and build an XML interface to integrate the engine with the Agent reservation system. 5- **@2010** integrate the TUI Company website (Iberotel.com English version) by enabling Iberotel.com site visitors to book throw our Engine from TUI Website. 6- **@2010** adding New Features for website and CMS and enhancing Booking performance. 7- **@2010** Build Nile Cruise Booking Engine. 8- **@2011** Analyze, design and implement the Centralized Reservation System (CRS) for controlling all branch reservations. **www.travcotravel.com**: online portal for travel **Tasks:** 1- @2009 Analyze, Design, and Implement an online agent tariff system (ATS). This system for viewing our (Hotels, Cruises, cars) tariff for registered agents. (ATS) The back end enables the operators to build dynamic tariff equations for each agent to view different rates based on a contract with the agent. 2- @2010 Upgrade website and Integrate web site with Online Booking Engine exist in http://www.Jaz.travel **www.prestigecars.net**: online car rent system **www.madinatmakadigolf.com:** website for Madinat Makadi resort contain resort facilities.
Freelance projects	1- www.akshef.com: in 2016, Online Portals for Booking Doctors (ASP.NET MVC) 2- www.esnk.org in 2015 Admission Management System (PHP) 3- www.elmawared.com: in 2010, the Employment recruiting Service 4- www.kotobarabia.com in 2010 (Old Version Not currently online) online book store **Online HR Portal for Government**: in 2016, I led the technical team in implementing an online HR portal containing modules (Employee directory, task management, contracting, recruiting, attendance, etc.). We build a generic layer for attendance that enables the admin to add attendance manually using upload Excel and CSV files or entering attendance using the attendance form or automatic by connecting to the attendance device local storage and fetching saved files or by using attendance SDK to get the required information. **Aramco and KJO Training in 2013** Train more than five teams in ARAMCO on developing and creating projects. (I received thanks mail from ARAMCO IT Manager and Development team) **Google Cloud Notification service for NIS schools in 2015** Build an android Mobile application that receives notifications from an online portal for schools using GCM cloud service.
Articles	**IronWebScraper:** https://ironsoftware.com/csharp/webscraper/tutorials/webscraping-in-c-sharp/ **Dynamic Controls:** Article Solve Dynamic Web Control Problem **www.codeproject.com/KB/miscctrl/Dynamic_Control.aspx** **Free Moving Forms:** Building Control Extending Free Move for Forms **www.codeproject.com/KB/miscctrl/Moving_Form.aspx**

EDUCATION

Degree	BSc in Computer Science & Management Technology (2003/2004), From Modern Academy, General Grade Good, Graduation Project Grade EXCELLENT.
Graduation Project	The project is a **3D game (1's Person View)** & as a team leader. I got many experiences like: • AI (Artificial Intelligent) Programming design & implementation • Network Programming design & implementation • Leading, planning, and managing skills.
